## INDIANA STATE TEACHERS COLLEGE

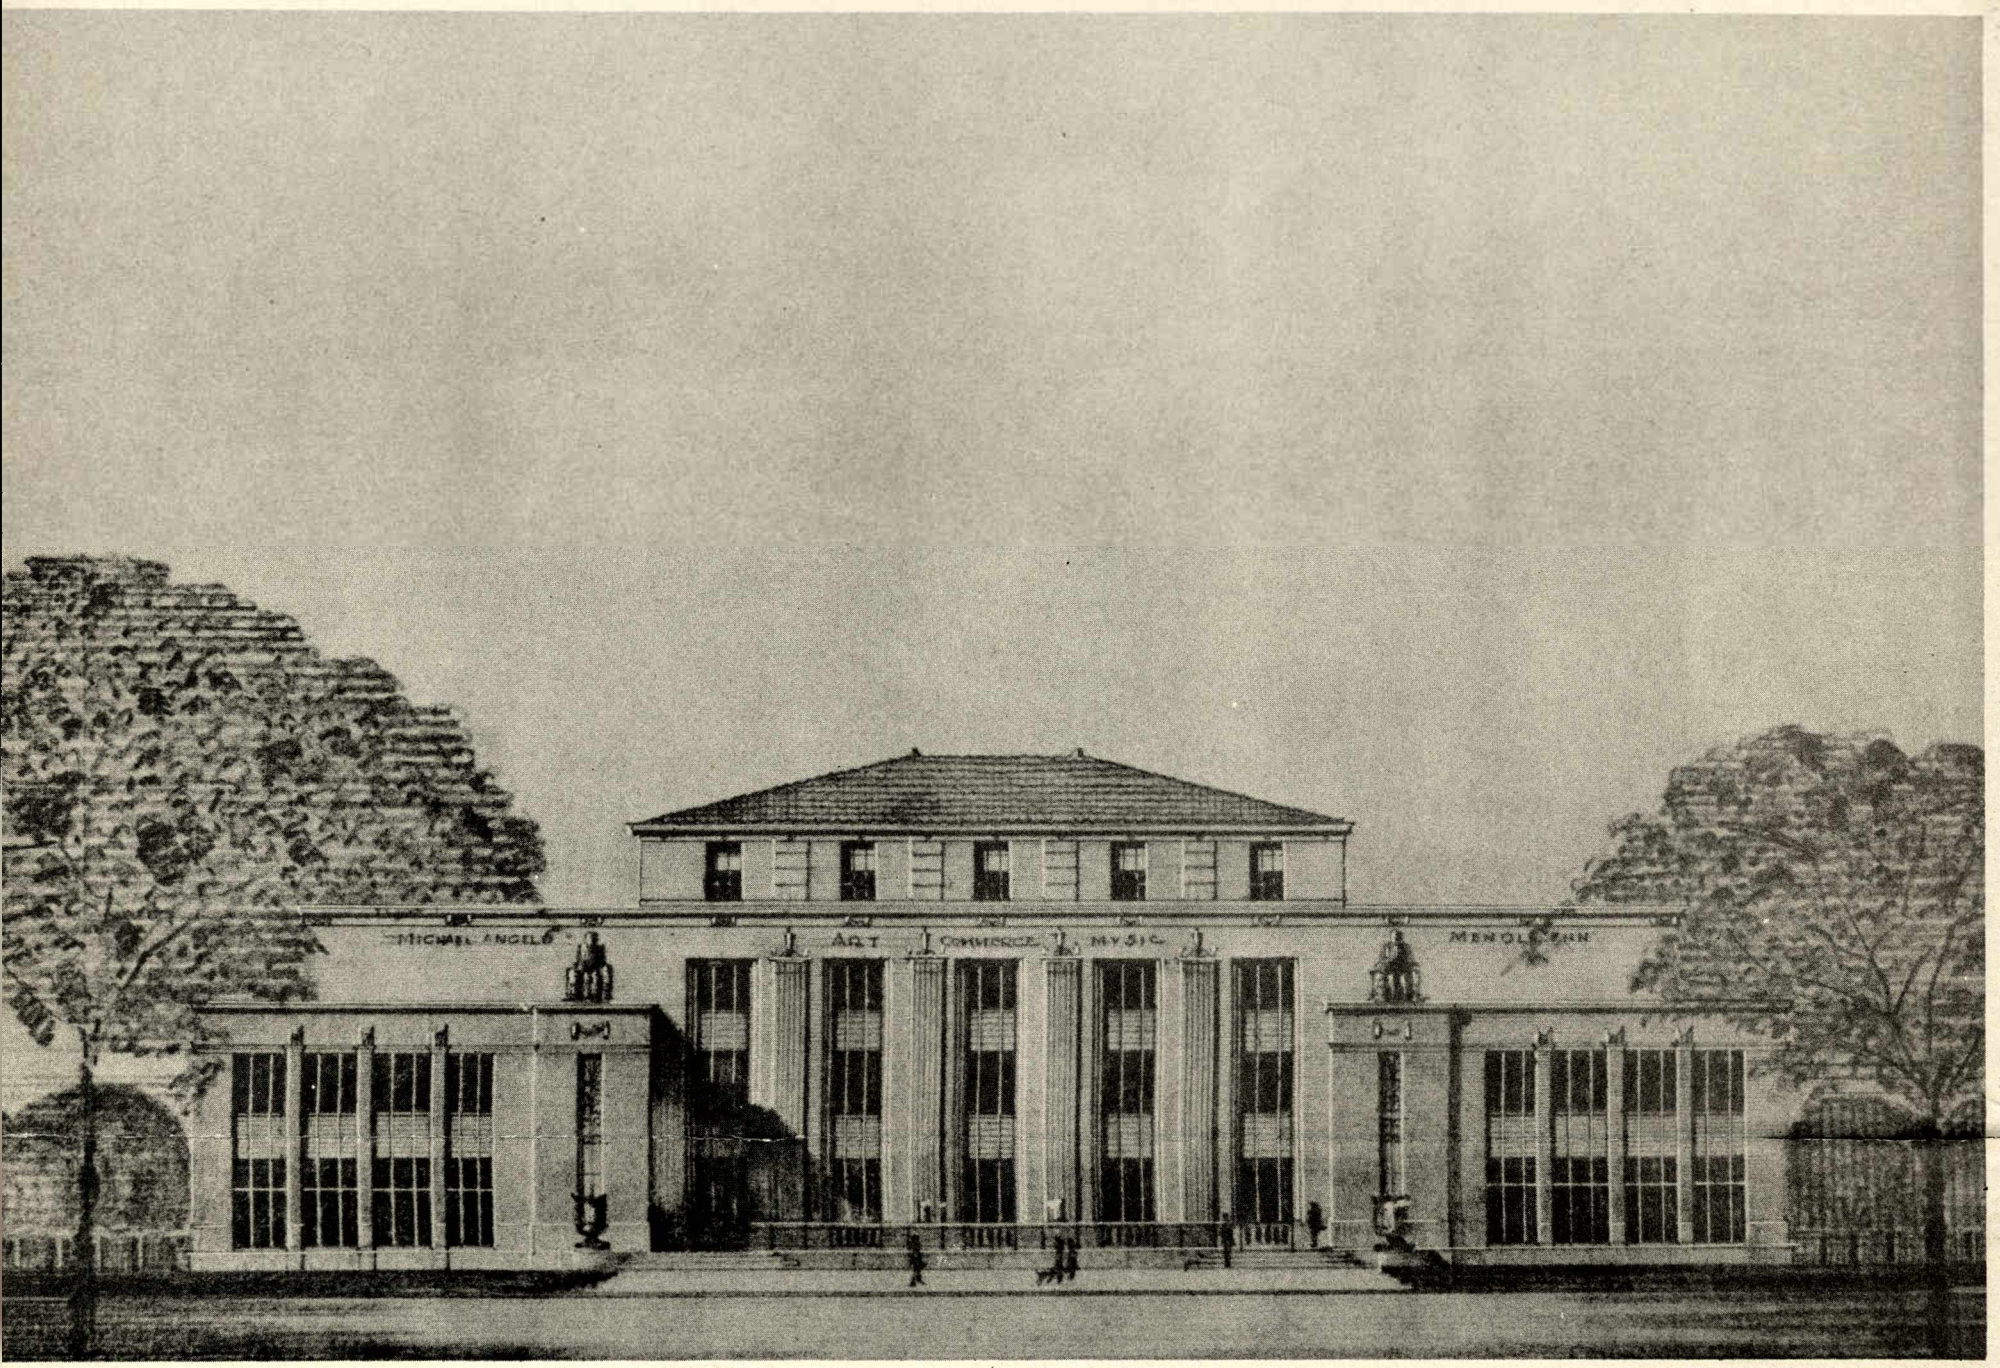
TERRE HAUTE

NEAR THE

COLLEGE GOAL

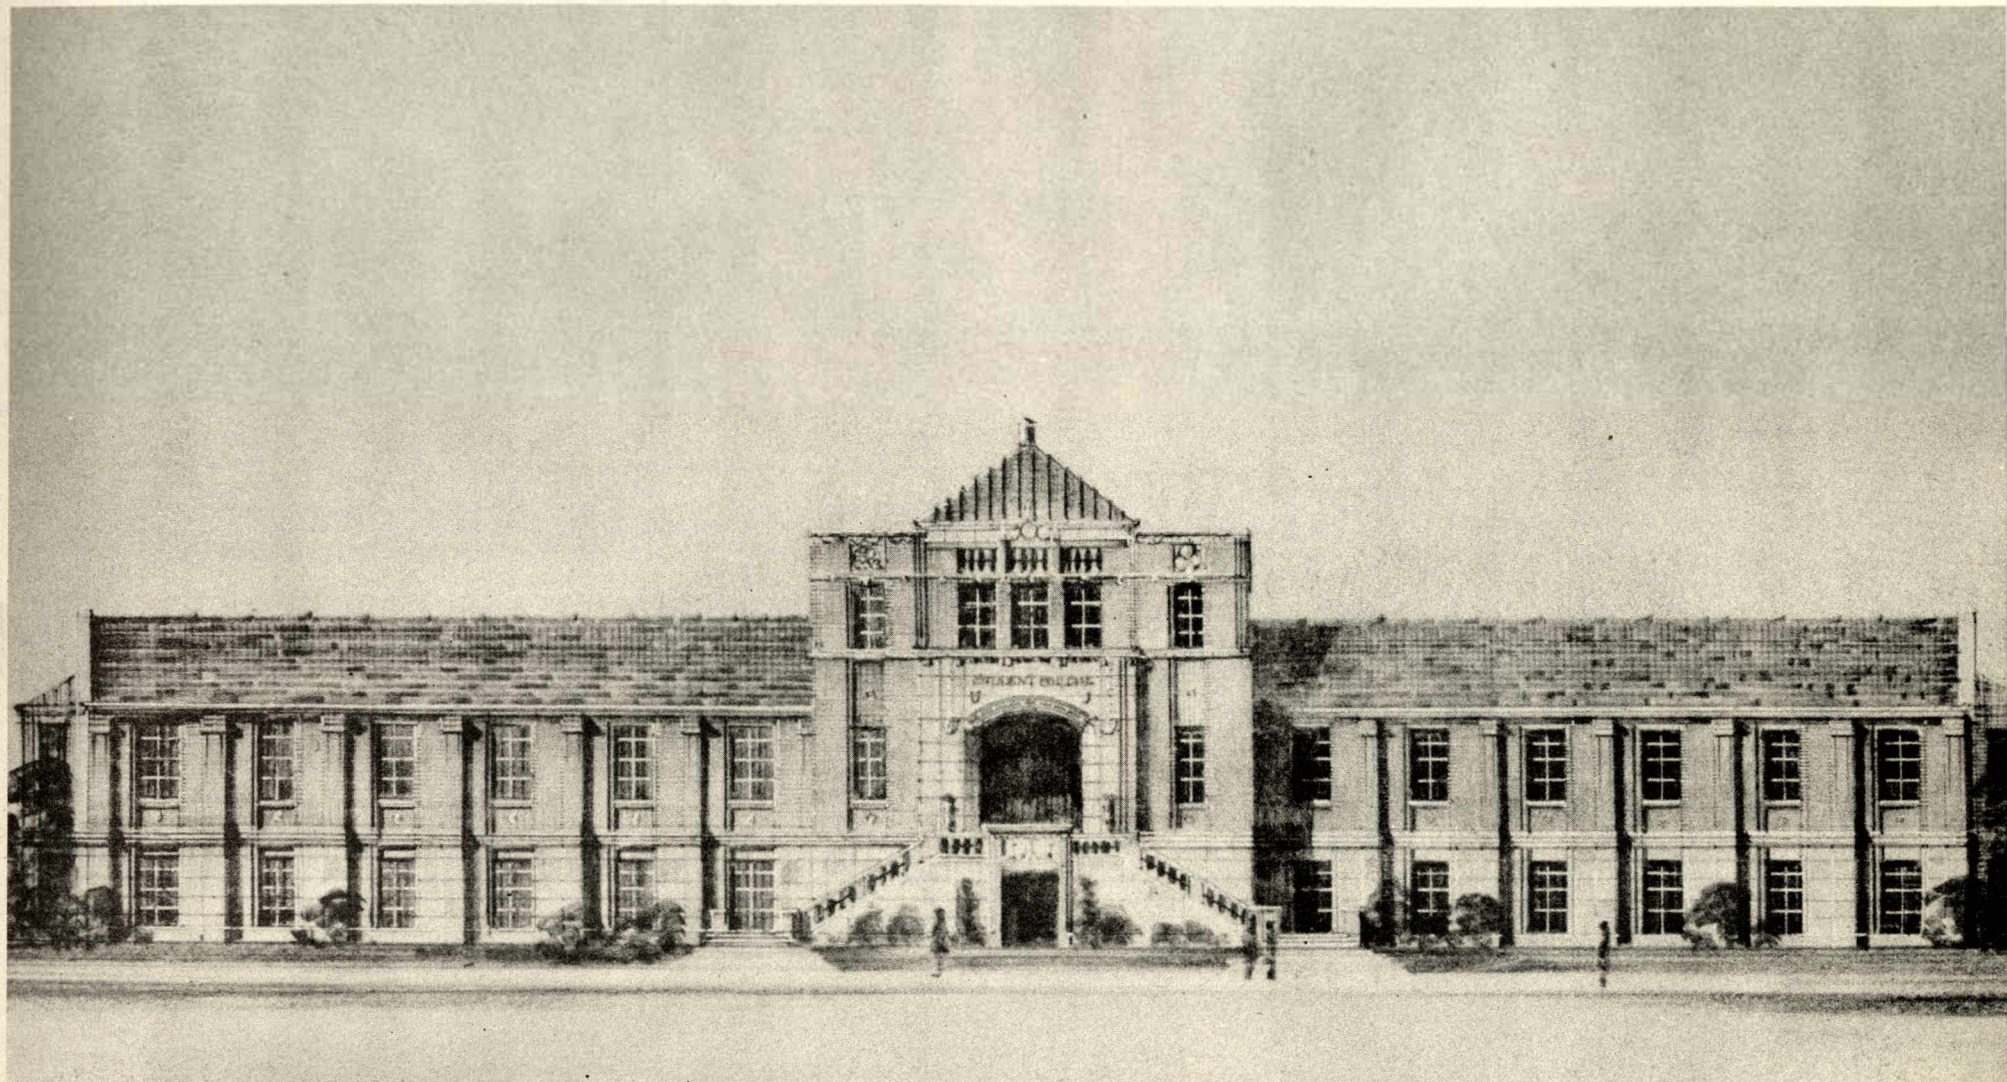
Indiana State Teachers College—founded in 1870—is one of the oldest and the sixth largest teachers college in the United States. It is fully accredited by all the recognized agencies of evaluation in its field. All the courses of study are of four years duration, and graduate study is offered in the Graduate Division. Graduates earn teaching licenses which are honored throughout the United States, and the College's credits are recognized by institutions of higher education in America and abroad. Enrollment is for both men and women. More than three thousand different students attend the College during an academic year, and the average enrollment in each term is 1,450. There is a faculty of 133 members.

THE NORTH CAMPUS LOOKING EAST



# NEW FINE ARTS AND COMMERCE BUILDING

The new Fine Arts and Commerce Building, which will be ready for occupancy on December 30, 1939, will house in the most modern facilities the art, music and commerce departments. The building is sound insulated throughout, and will contain an art gallery, music practice rooms, and a music hall for recitals. A notable collection of prize-winning paintings will be located in the art gallery. The commerce department will have one of the most extensive assemblies of business machinery ever gathered together for instructional purposes. Other academic departments elsewhere on the campus are: education, English, foreign language, home economics, industrial arts, library science, mathematics, music, physical education for men, physical education for women, philosophy and ethics, science and social studies. Each offers a broad range of subjects in its field. The College library, with 133,000 volumes, is second only to that of Columbia University in size among the nation's teachers colleges.



# NEW STUDENT UNION BUILDING AND AUDITORIUM

The new Student Union Building and Auditorium, now under construction, is symbolic of the great improvements which have been made in the physical plant of Indiana State Teachers College. The College occupies seventeen buildings on a fourteen-acre campus in the heart of Terre Haute. The new model Laboratory Training School, men's dormitory, Student Union Building, Fine Arts and Commerce Building, and extensive campus improvements have constituted a two-million dollar building program in the last five years. The Union Building will be the center of student life on the campus. It will contain rooms for meetings, study and recreation, a cafeteria, an A.A.U. regulation length swimming pool, and an auditorium seating two thousand persons. It will be ready for occupancy on December 30, 1939. The College offers a broad range of extra curricular activities. Its convocation series will bring to the stage of the auditorium many of the nation's most outstanding personalities.

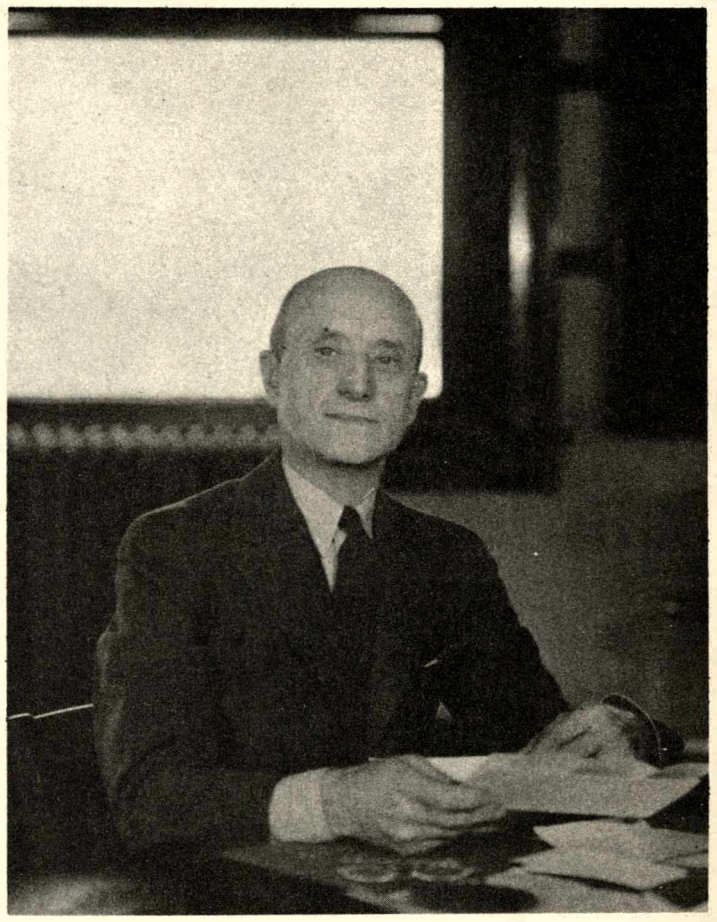
MEN'S LOUNGE



The key to the question, "Who should go to college?" is found in an analysis of the successful college student as we know him. He is ambitious, willing to work, and frequently ready to sacrifice to continue his education. In high school he demonstrated good qualities of character and reasonable ability in his studies. His professors have discovered that he possesses intellectual curiosity. He realizes that study and learning are the prime objectives of college attendance although he is not blind to the less direct benefits of campus life. He is in reasonably robust health, and takes care of himself, for college is a rather strenuous life that demands one's best efforts. Anyone fitting this general pattern can safely decide to go to college.
